# KINETICDATA

Secure Workflow Expertise

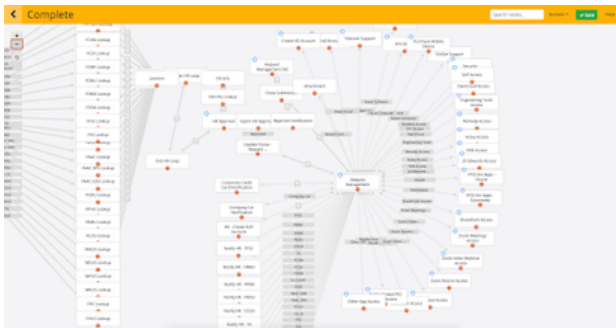

Experiences

Create visually appealing experiences for all stakeholders – across any device – for ease of use with a modern look and feel.

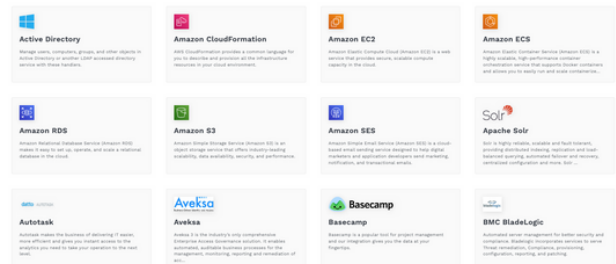

Data

Collect, store and display relevant workflow data for lightening–fast assessment and decision making.

Low Code

From the simple to the complex, build and automate workflows to support your process and reduce the drain on resources.

Integrations

Connect systems to streamline processes and maximize existing organizational investments.

About Kinetic Data

Kinetic Data provides workflow automation software to government agencies to help improve service delivery and drive process improvements. Our platform offers sleek user experiences, workflows and comprehensive integrations that enable agencies to supercharge their resources and maximize efficiency and productivity. U.S. Agencies like the Army, Navy, Department of Energy, USDA and the Federal Reserve rely on Kinetic to help streamline their operations.
