KINETICDATA

Digitize & Automate Clinician Yearly Certifications & Accreditations

Problem:

Annually, VA Clinicians must complete required accreditations or certifications to be compliant to treat patients. However, the lack of alerts for clinicians, and lack of digital workflows and visibility into the completion causes undue complexity for the individual, the accreditation office, the medical centers, and VA leadership.

Impact:

With hundreds of VA Medical Centers, outpatient sites, and long term care facilities, a digital solution to this arduous process would positively impact 1000s of clinicians and allow better visibility for the accreditation office. Additionally, the president's recent mandate on treating women veterans at every medical center will require VA leadership to monitor accreditations more closely.

Solution:

Kinetic Data converts traditional paper processes into digital experience workflows that speed processing time, improve accuracy and increase compliance at the touch of a button.

With Kinetic's Digital Form Solution, the VA will benefit from:

- Digital portability and experiences that everyone expects in today's environments.
- Timely alerts to all stakeholders for upcoming training activities and completion notices.
- Visibility, feedback and approvals all stored in digital format for easy retrieval and updates.

Key Features:

TMS Integration, Training Alerts, Training Completion Notifications, Process Digitization, PDF and other Form Automation, Self-Service Portals.

Key Benefits:

- Data entry done right. Done the first time with no errors and minimizes mistakes.
- Scheduling, alerting and visibility on a consistent, repeatable basis across all clinicians.
- No per-user license costs results in scale with improved economic model.

Tech Areas:

- Integrations with ERP systems, ordering and fulfillment centers. Automation across repetitive processes for scale.
- Flexible workflows that handle high volume, complex, compliant requirements.
- End-to-end visibility on status/delivery, from requestor to partners and suppliers. Alerting along the way.
