

Digitize, Automate and Scale the VA Travel Nurse Corps Program

Problem:

Recruitment and retention of nurses into the VA Travel Nurse Corps Program poses several key challenges, including paperwork shuffling, understaffing, burnout and lack of support.

Up front, the administrative burden of completing the VA-10-2850a, plus resume, application screening documentation, licenses and certifications require a briefcase to contain. Wouldn't a digital solution that's easy, repeatable and user friendly help recruit and retain?

Solution:

Kinetic Data converts traditional paper processes into digital experience workflows that speed processing time, improve accuracy and increase compliance at the touch of a button.

With Kinetic's Digital Form Solution, the VA TNC Program will benefit from:

- Digital portability of data and experiences that everyone expects in today's environments.
- Timely approval process with notifications for the individual, the medical facility and administration.
- Visibility and feedback all stored in digital format for easy retrieval and updates.

Key Benefits:

- Data entry done right. Done the first time with no errors and minimizes mistakes.
- Scheduling, alerting and visibility on a consistent, repeatable basis across all stakeholders.
- No per-user license costs results in scale with improved economic model.

Key Features:

Talent Pooling and Access, Training Alerts, Training Completion Notifications, Process Digitization, PDF and other Form Automation, Self-Service Portals.

Tech Areas:

- Integrations with ERP systems, ordering and fulfillment centers. Automation across repetitive processes for scale.
- Flexible workflows that handle high volume, complex, compliant requirements.
- End-to-end visibility on status/delivery, from requestor to partners and suppliers. Alerting along the way.
